

The participants to the 39th Annual General Meeting of the
European Brain and Behaviour Society

with the contribution of the

Interdisciplinary Laboratory of SISSA

warmly invite scientists from the University, ICGEB, ICTP, SISSA and anybody interested in the brain, to attend the opening of their meeting

Saturday Sept 15, at 19:00 at Stazione Marittima

- 19:16 sharp Sunset and welcome
- 19:20 salute by Prof Giorgio Innocenti, president of EBBS
- 19:25 introduction by Prof Vincent Torre, Int. Lab. director
- 19:30 public lecture by Prof **Susumu Tonegawa**, MIT
1987 Nobel prize in Physiology and Medicine, on
"Molecular and circuit mechanisms for hippocampal memory"

We study molecular, cellular, and neuronal circuit mechanisms underlying acquisition, consolidation and retrieval of hippocampus-dependent memory in rodents. Our primary approach is to generate cell type and adult-restricted knockout mice and characterize them using multifaceted methods including molecular and cellular biology, *in vitro* and *in vivo* electrophysiology, confocal and two photon microscopy and behavioral tasks.
