

I contributed to the development of Integrable Quantum Field Theory. This allowed me, in particular, to obtain main results for the correlation functions and other universal aspects of the Ising model with magnetic field. My results for the Ising universality class are contained in the papers below, those up to 2004 are pedagogically reviewed in [5].

- [1] DELFINO G, G. MUSSARDO (1995). The spin-spin correlation function in the two-dimensional Ising model in a magnetic field at $T = T_c$. NUCLEAR PHYSICS. B, vol. 455, p. 724-758, doi: 10.1016/0550-3213(95)00464-4
- [2] DELFINO G, P. SIMONETTI (1996). Correlation functions in the two-dimensional Ising model in a magnetic field at $T = T_c$. PHYSICS LETTERS. SECTION B, vol. 383, p. 450-456, doi: 10.1016/0370-2693(96)00783-6
