Work experience

Dates
 Occupation or position held

From 1 April 2017

Postdoc Talents³ fellowship (Assegno di ricerca).

- Within the recently obtained Talents3 fellowship (<https://www.areasciencepark.it/innovazione/programmi-di-mobilita-internazionale-talents/>) investigations have carried out to study defects in rare-earth and rare-earth P-codoped silica based optical fibers. Given its relevance for the RE doping, also P-doped silica and P₂O₅ optical and vibrational properties have been studied (Outgoing phase started in April 2017 at the Materials Research Laboratory of the University of Nova Gorica, while return phase started in April 2018 at SISSA).
- Awarded with a computational grant through the HPC Challenge of Arctur d.o.o. (2018).
- IS CRA-B project leader. CINECA grant OXYRIS-HP10B5K2GU (2017).

Name and address of employer

Area Science park FVG Trieste (Italia)

Dates
 Occupation or position held

From 1 September 2012 to 28 February 2017

Postdoc (Assegno di ricerca).

- Research project dedicated to color centers in pure, Ge-doped vitreous silica (v-SiO₂) and vitreous germania (v-GeO₂), the understanding of which is of paramount importance for improving the performances of silica-based optical fibers as well as microelectronic devices. This is especially true for applications in harsh-environments where a high concentration of these radiation-induced defects can stop the normal functioning of silica-based devices. In particular, a class of paramagnetic color centers in silica based materials, i.e. the E' centers, will be investigated by means of first-principles calculations of electron paramagnetic resonance (EPR) parameters by using the Quantum-Espresso package.
- IS CRA-B project leader. CINECA grant OMEGAFIB-HP10BMKWVL (2015-2016).
- IS CRA-B project leader. CINECA grant EPRFIBER-HP10B4CVBH (2013-2014).

Name and address of employer

CNR-IOM/Democritos, c/o SISSA via Bonomea 265, 34136 Trieste (Italia).

Dates
 Occupation or position held
 Main activities and responsibilities

From 9 January 2012 to 30 June 2012.

Visiting scientist (Postdoc).

- Development of programs and scripts for calculating the dissociation constant of water at high pressure and temperature by using an ab-initio parametrized force field for water.

<p>Name and address of employer</p> <p>Dates</p> <p>Occupation or position held</p> <p>Main activities and responsibilities</p>	<ul style="list-style-type: none"> • I have been <i>co-advisor of a diploma thesis project</i> of a student at ICTP (Mr. R. Kanak, Supervisor Prof. S. Scandolo): "the dissociation constant of water at extreme conditions: a molecular dynamics study" (April-June 2012). • Research project "First-principles study of electronic defects in vitreous silica". This project especially aims at improving our understanding of silica under irradiation, e.g in optical fibers used in harsh-environments as in nuclear power plants (work in collaboration with Prof. S. Scandolo ICTP, Dr. L. Martin-Samos, University of Nova-Gorica, and Prof. S. De Gironcoli SISSA) <p>The Abdus Salam International Centre for Theoretical Physics (ICTP).</p> <p>From 16 December 2009 to 15 December 2011.</p> <p>Postdoc.</p> <ul style="list-style-type: none"> • Help in testing and developing of the GWL code for GW calculations of large systems such as organic dyes on a titania surface (work in collaboration with Dr. P. Umari, Università di Padova and Prof. F. De Angelis, Università di Perugia). Study of electronic, structural and vibrational properties of amorphous materials (a-Si₃N₄, v-GeSe₂, v-SiO₂). • Referee for an international founding agency and for international peer-review journals. • Use of the large computer facilities provided by CINECA (https://hpc.cineca.it/). • I helped Prof. S. Baroni in <i>supervising</i> a first year SISSA PhD student, whose project concerned the study of the absorption spectra of a class of natural dyes by using time dependent density functional techniques. • Maintenance of the package "Vibtools" for post-processing of vibrational spectra (www.qeforge.org).
<p>Name and address of employer</p> <p>Dates</p> <p>Occupation or position held</p> <p>Main activities and responsibilities</p>	<p>Scuola Internazionale Superiore di Studi Avanzati (SISSA), via Bonomea 265, 34126, Trieste (Italia).</p> <p>From 15 March 2007 to 15 December 2009</p> <p>Postdoc (Assegno di ricerca).</p> <ul style="list-style-type: none"> • Study of dislocation properties in coesite (SiO₂), and of high-pressure phase transitions of gypsum relevant for the understanding of Earth mantle rheology. Study of electronic, structural and vibrational properties of amorphous materials (a-Si₃N₄, v-GeO₂, v-SiO₂). • Referee for international peer-review journals (J. of Applied Physics; Physical Review B; J. of Physics-Condensed Matter) • Visit to LSPES laboratory (Lille, France) for scientific collaboration in the framework of the Postdoc research project concerning the study of dislocations in coesite. January 2009. • Visit to Kyoto University (Japan) for scientific collaboration in the framework of the Postdoc research project concerning the study of dislocations in coesite. March 2008.
<p>Name and address of employer</p>	<p>CNR-INFN/Democritos, Strada costiera 11, 34151 Trieste (Italia), at the Abdus Salam International Centre for Theoretical Physics (ICTP).</p>

Teaching experiences

- (Feb–March 2012) Online tutor via MOODLE interface for the "Advanced Electromagnetism" course held at ICTP. Main tasks: write html documentation for the course lessons; provide students with materials (books, exercises, multiple choice quizzes, online lessons).
- (July 2010). Oral presentation: *Introduction to the VibTOOLS package*. CECAM tutorial: Simulating Spectroscopy using Quantum-ESPRESSO related codes. SISSA (Trieste, IT).
- (From 2003 to 2006) I assisted Prof. A. Pasquarello for the lectures: *Cours de Physique générale III et IV pour Systèmes de Communication (3ème et 4ème semestres)*. In particular, I was involved in preparing exams and helping students to solve exercises classes.

Other academic achievements, honors, and activities

- Chairman of the session "Defects and Modeling II" at The 12th International Symposium on SiO₂: SiO₂2018, (Bari, Italy) 11-13 June 2018.
- Individual membership of the European Physical Society (2018).

Education and training

Dates
 Title of qualification awarded
 Title of the Thesis
 Principal subjects/Occupational skills covered

 Name and type of organization providing education and training

- Final evaluation (scientific production) of procedure 831_R (2011) at University of Turin: more than good.
- French qualification aux fonctions de Maître de Conférences (2010).

From 01/01/2003 to 04/03/2007.

Docteur ès Sciences.

First principles vibrational spectra of tetrahedrally-bonded glasses: SiO₂, GeO₂, and GeSe₂.

- Physics of glasses.
 - Programming in Fortran90, Bash, Perl, Python.
 - Preparing scientific papers (cfr. p. 3) and oral presentations concerning the PhD research project.
 - Use of the large computer facilities provided by CSCS (www.cscs.ch) e dell'EPFL.
 - Use of the programs in the Quantum ESPRESSO package for electronic structure calculations.
- Ecole Polytechnique Fédérale de Lausanne (EPFL), Lausanne, Switzerland.

Selected Conferences and Talks.

- 1 Oral presentation (invited): *Color centers in P-doped silica: generation, conversion mechanisms and optical properties*. The 12th International Symposium on SiO₂: SiO2018, (Bari, Italy) 11-13 June 2018.
- 2 Oral presentation: *Color centers in P-doped silica optical fibers: a first-principles investigation*. 8^{mes} Journées sur les Fibres Optiques en Milieu Radiatif, University of Mons, (Mons, Belgium) 11-12 Dec. 2017.
- 3 Oral presentation: *Color centers in P-doped and Yb-doped silica optical fibers: a first-principles investigation*. FisMat2017, (Trieste, Italy), 1-5 Oct. 2017.
- 4 Oral presentation: *Paramagnetic H-related defects in silica: a first-principles investigation*., CMMSE2016 (Cadiz, Spain) July 4-8, 2016.
- 5 Oral presentation: *Spectroscopie théorique (RPE, Raman, ...): état de l'art+exemples+limitations*, Workshop Approche Couplée, University of Saint-Etienne, June 16-17, 2016.
- 6 Poster presentation: *First-principles calculations of EPR parameters of P-related defects in SiO₂*, 11th International Symposium on SiO₂, University of Nice (Nice, France), 13 Jun–15 June 2016.
- 7 Oral presentation: *First-principles investigation of paramagnetic centers in ν -SiO₂, Ge-doped SiO₂ and ν -GeO₂*. FisMat2015, (Palermo, Italy), 27 Sept. - 2. Oct. 2015.
- 8 Poster presentation: *Paramagnetic centers in α -GeO₂*. INFOS2015, University of Udine (Udine, Italy), 29 Jun–2 July 2015.
- 9 Poster presentation: *Unravelling the origin of the E'_α and Ge(2) centers*. Total Energy, ICTP(Trieste, Italy). 15–17 Jan. 2015
- 10 Oral presentation: *First-principles calculations of EPR parameters of E' centers in ν -SiO₂*. Eurodim2014 (Canterbury, United Kingdom). 13–19 July 2014.
- 11 Oral presentation: *First-principles calculations of EPR parameters of vacancy-related defects in ν -SiO₂*. SiO₂ 2014 Symposium (Cagliari, Italy). 16–18 June 2014.
- 12 Oral presentation: *Radiation induced color centers in Silica: a first-principles investigation*.. CMSSE2013 (Almeria, Spain). 24–27 June 2013.
- 13 Participation to 3^{mes} Journées sur les Fibres Optiques en Milieu Radiatif, University of Nice, (Nice, France) 12-13 nov. 2012.
- 14 Oral presentation: *First-principles investigation of chemical disorder in Vitreous GeSe₂*. ESG2012 (Maastricht, Hollande). 3–6 June 2012.
- 15 Poster presentation: *First-principles study of electronic defects in silica glass*. ESG2012 (Maastricht, Hollande). 3–6 June 2012.
- 16 Poster presentation: *Many Body Perturbation Theory simulations of the electronic properties of large systems*. CECAM workshop: Challenges and Solutions in GW Calculations for Complex Systems UNIL (Lausanne, Switzerland). 7–10 June 2011.
- 17 Poster presentation: *First-Principles Investigation of α -Si₃N₄*. CECAM workshop: Which Electronic Structure Method for the Study of Defects? EPFL (Lausanne, Switzerland). June 2009.

- 18 Oral presentation: *Vibrational spectra of vitreous SiO₂ and vitreous GeO₂ from first-principles*. CECAM workshop: Mineral spectroscopy by theory and experiment. EPFL (Lausanne, Switzerland). Oct. 2008.
- 19 Posters presentation: *Generalized stacking fault energy surfaces and dislocations properties in Coesite and First-Principles Investigation of the Structural and Vibrational Properties of α -Si₃N₄*. CPMD workshop. ICTP (Trieste, IT). June 2008.
- 20 Oral presentation (Invited): *Vibrational spectra of vitreous SiO₂ and vitreous GeO₂ from first-principles*. CECAM workshop: Glasses meet Glasses (Lyon, France). June 2007.
- 21 Poster presentation: *Vibrational spectra of vitreous GeO₂ and vitreous GeSe₂ from first-principles*. First EuroMinSci Conference (La Colle sur Loup, Nice, France). March 2007.
- 22 Oral presentation: *Medium-Range Structural Properties of Vitreous Germania Obtained through First-Principles Analysis of Vibrational Spectra*. APS March Meeting (Baltimore, USA). March 2006.
